

## Substrates, Shapes and Finishing Options

At **Maritime Labels & Packaging**, we based our custom printing service on using only the best in pressure sensitive substrates and materials while offering a vast array of finishing options to suit our clients' needs.

Through partnering with the industry's best, **Maritime Labels & Packaging** is able to offer a vast variety of pressure sensitive and non-pressure sensitive materials for your custom printing requirements. You receive the benefit of more choices for quality and application.

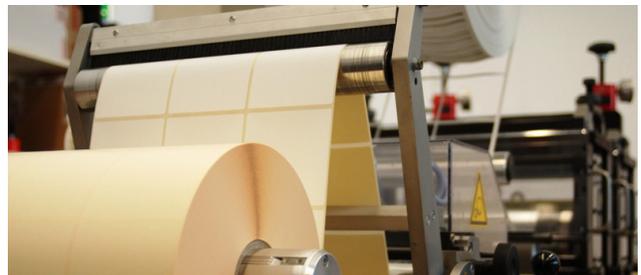

Substrate choice and label design can greatly impact product shelf appeal. Choose between paper, films, foil, and more to assist with your overall marketing impact.

An eye-catching print doesn't end with design and substrate choice. Special shape label die cuts can

compliment packaging by adding three dimensional appearance and attract consumer interest to increase sales.

Top it all off with a finishing option that suits the product's shelf appeal. Gloss, matte, and satin finishes add the appropriate "finishing touch" to emphasize overall product characteristics.

Consult with **Maritime Labels & Packaging** today about a high-impact print construction to help you!
